## GUITAR EFFECTS PROCESSOR

HX EFFECTS

**\$880**

U.P. \$999

The Crush 20RT builds on the tonal platform of the Crush 20 with even more of functionality through the inclusion of lush onboard reverb and an integrated chromatic tuner. The Crush 20RT features Clean and Dirty channels plus our new high gain, four stage preamp design, serving up a huge palette of overdriven and distorted sounds, rich in harmonic overtones.

This modeling amp offers top-notch sound right out of the box, with 16 presets that range from Clean to Crunch to Insane. Acoustic guitarists and bass players also get their own great-sounding presets. And the Spider V 20's intuitive interface makes it a breeze to use.

HX Effects is able to take total control of your guitar rig, supplement your pedalboard, or anything in between. With over 100 HX-quality effects, you'll never run out of tones.
