The above warning is located on the rear of the unit. L’avertissement ci-dessus est situé sur l’arrière de l’unité.

Explanation of Graphical Symbols

The lightning flash with arrowhead symbol within an equilateral triangle is intended to alert the user to the presence of uninsulated “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product.

Le point d’exclamation à l’intérieur d’un triangle équilatéral est destiné à attirer l’attention de l’utilisateur sur la présence d’instructions importantes sur l’emploi ou la maintenance (réparation) de l’appareil dans la documentation fournie.

IMPORTANT SAFETY INSTRUCTIONS

1 Read these instructions.
2 Keep these instructions.
3 Heed all warnings.
4 Follow all instructions.
5 Do not use this apparatus near water.
6 Clean only with dry cloth.
7 Do not block any ventilation openings. Install in accordance with the manufacturer’s instructions.
8 Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9 Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10 Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11 Only use attachments/accessories specified by the manufacturer.
12 Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
13 Unplug this apparatus during lightning storms or when unused for long periods of time.
14 Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

WARNING
TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPARATUS TO RAIN OR MOISTURE.
FCC INFORMATION (U.S.A.)

1. IMPORTANT NOTICE: DO NOT MODIFY THIS UNIT!
This product, when installed as indicated in the instructions contained in this manual, meets FCC requirements. Modifications not expressly approved by Yamaha may void your authority, granted by the FCC, to use the product.

2. IMPORTANT: When connecting this product to accessories and/or another product use only high quality shielded cables. Cable/s supplied with this product MUST be used. Follow all installation instructions. Failure to follow instructions could void your FCC authorization to use this product in the USA.

3. NOTE: This product has been tested and found to comply with the requirements listed in FCC Regulations, Part 15 for Class “B” digital devices. Compliance with these requirements provides a reasonable level of assurance that your use of this product in a residential environment will not result in harmful interference. This equipment generates/uses radio frequencies and, if not installed and used according to the instructions found in the users manual, may cause interference harmful to the operation of other electronic devices. Compliance with FCC regulations does not guarantee interference will not occur in all installations. If this product is found to be the source of interference, which can be determined by turning the unit “OFF” and “ON”, please try to eliminate the problem by using one of the following measures:
- Relocate either this product or the device that is being affected by the interference.
- Utilize power outlets that are on different branch circuit breaker/fuse circuits or install AC line filter/s.
- In the case of radio or TV interference, relocate/ reorient the antenna. If the antenna lead-in is 300 ohm ribbon lead, change the lead-in to co-axial type cable.
- If these corrective measures do not produce satisfactory results, please contact the local retailer in charge of sales and service of this product.
- The above statements apply ONLY to those products distributed by Yamaha. These statements do not apply to products distributed by Yamaha subsidiaries or Yamaha authorized distributors.

NOTE: This product contains a lithium battery for memory back-up. Please contact your local dealer for battery disposal. Improper battery disposal may cause fire or explosion.

ADVARESI!

VARNING

VAROITUS

COMPLIANCE INFORMATION STATEMENT
(DECLARATION OF CONFORMITY PROCEDURE)

Responsible Party : Yamaha Corporation of America
Address : 6600 Orangethorpe Ave., Buena Park, Calif. 90620
Telephone : 714-522-9011
Type of Equipment : Digital Mixing Console
Model Name : TF5/TF3/TF1

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
1) this device may not cause harmful interference, and
2) this device must accept any interference received including interference that may cause undesired operation. See user manual instructions if interference to radio reception is suspected.

This product contains a battery that contains perchlorate material.
Perchlorate Material—special handling may apply, See www.dtsc.ca.gov/hazardouswaste/perchlorate.

This applies only to products distributed by YAMAHA CORPORATION OF AMERICA.

In Finland: Laite on liitettävä suojamaadoituskoskettimilla varustettuun pistorasiaan.
In Norway: Apparatet må tilkoples jordet stikkontakt.
In Sweden: Apparaten skall anslutas till jordad uttag.
PLEASE READ CAREFULLY BEFORE PROCEEDING
Please keep this manual in a safe place for future reference.

WARNING
Always follow the basic precautions listed below to avoid the possibility of serious injury or even death from electrical shock, short-circuiting, damages, fire or other hazards. These precautions include, but are not limited to, the following:

Power supply/power cord
- Do not place the power cord near heat sources such as heaters or radiators, and do not excessively bend or otherwise damage the cord, place heavy objects on it, or place it in a position where anyone could walk on, trip over, or roll anything over it.
- Only use the voltage specified as correct for the device. The required voltage is printed on the name plate of the device.
- Use the specified adaptor (page 7) only. Using the wrong adaptor can result in damage to the device or overheating.
- Use only the supplied power cord/plug.

If you intend to use the device in an area other than in the one you purchased, the included power cord may not be compatible. Please check with your Yamaha dealer.
- Check the electric plug periodically and remove any dirt or dust which may have accumulated on it.
- When setting up the device, make sure that the AC outlet you are using is easily accessible. If some trouble or malfunction occurs, immediately turn off the power switch and disconnect the plug from the outlet. Even when the power switch is turned off, as long as the power cord is not unplugged from the wall AC outlet, the device will not be disconnected from the power source.
- Remove the electric plug from the outlet when the device is not to be used for extended periods of time, or during electrical storms.
- Be sure to connect to an appropriate outlet with a protective grounding connection.

Do not open
- This device contains no user-serviceable parts. Do not open the device or attempt to disassemble the internal parts or modify them in any way. If it should appear to be malfunctioning, discontinue use immediately and have it inspected by qualified Yamaha service personnel.

Water warning
- Do not expose the device to rain, use it near water or in damp or wet conditions, or place on it any containers (such as vases, bottles or glasses) containing liquids which might spill into any openings. If any liquid such as water seeps into the device, turn off the power immediately and unplug the power cord from the AC outlet. Then have the device inspected by qualified Yamaha service personnel.
- Never insert or remove an electric plug with wet hands.

Hearing loss
- Avoid setting all equalizer controls and faders to their maximum. Depending on the condition of the connected devices, doing so may result in feedback that can cause hearing loss and damage the speakers.
- Do not use headphones for a long period of time at a high or uncomfortable volume level, since this can cause permanent hearing loss. If you experience any hearing loss or ringing in the ears, consult a physician.
- When turning on the AC power in your audio system, always turn on the power amplifier LAST, to avoid hearing loss and speaker damage. When turning the power off, the power amplifier should be turned off FIRST for the same reason.

Fire warning
- Do not place any burning items or open flames near the device, since they may cause a fire.

If you notice any abnormality
- If any of the following problems occur, immediately turn off the power switch and disconnect the electric plug from the outlet.
  - The power cord or plug becomes frayed or damaged.
  - Unusual smells or smoke are emitted.
  - Some object has been dropped into the device.
  - There is a sudden loss of sound during use of the device.
  - The power switch or connectors to prevent injuries.

Before connecting the device to other devices, turn off the power for all devices. Also, before turning the power of all devices on or off, make sure that all volume levels are set to the minimum. Failing to do so may result in electric shock, hearing loss, or equipment damage.

Maintenance
- Remove the power plug from the AC outlet when cleaning the device.

Handling caution
- Do not insert your fingers or hands in any gaps or openings on the device (vents, panel, etc.).
- Avoid inserting or dropping foreign objects (paper, plastic, metal, etc.) into any gaps or openings on the device (vents, panel, etc.) If this happens, immediately turn off the power, unplug the power cord from the AC outlet, and have the device inspected by qualified Yamaha service personnel.
- Do not rest your weight on the device or place heavy objects on it, and avoid use excessive force on the buttons, switches or connectors to prevent injuries.
- Avoid pulling the connected cables to prevent injuries.

Power supply/power cord
- When removing the electric plug from the device or an outlet, always hold the plug itself and not the cord. Pulling by the cord can damage it.

Location
- Do not place the device in an unstable position where it might accidentally fall over and cause injuries.
- Do not block the vents. This device has ventilation holes at the top/front/rear to prevent the internal temperature from becoming too high. In particular, do not place the device on its side or upside down. Inadequate ventilation can result in overheating, possibly causing damage to the device(s), or even fire.
- Do not place the device in a location where it may come into contact with corrosive gases or salt air. Doing so may result in malfunction.
- Before moving the device, remove all connected cables.
- If the device is mounted in an EIA standard rack, carefully read the section “Precautions when rackmounting” on page 25. Inadequate ventilation can result in overheating, possibly causing damage to the device(s), malfunction, or even fire.

Connections
- Before connecting the device to other devices, turn off the power for all devices. Also, before turning the power of all devices on or off, make sure that all volume levels are set to the minimum. Failing to do so may result in electric shock, hearing loss, or equipment damage.

Precautions when rackmounting
- If the device is mounted in an EIA standard rack, carefully read the section “Precautions when rackmounting” on page 25. Inadequate ventilation can result in overheating, possibly causing damage to the device(s), malfunction, or even fire.

Quick Guide
- Before removing the electric plug from the device or an outlet, always hold the plug itself and not the cord. Pulling by the cord can damage it.

Location
- Do not place the device in an unstable position where it might accidentally fall over and cause injuries.
- Do not block the vents. This device has ventilation holes at the top/front/rear to prevent the internal temperature from becoming too high. In particular, do not place the device on its side or upside down. Inadequate ventilation can result in overheating, possibly causing damage to the device(s), or even fire.
- Do not place the device in a location where it may come into contact with corrosive gases or salt air. Doing so may result in malfunction.
- Before moving the device, remove all connected cables.
- If the device is mounted in an EIA standard rack, carefully read the section “Precautions when rackmounting” on page 25. Inadequate ventilation can result in overheating, possibly causing damage to the device(s), malfunction, or even fire.

Connections
- Before connecting the device to other devices, turn off the power for all devices. Also, before turning the power of all devices on or off, make sure that all volume levels are set to the minimum. Failing to do so may result in electric shock, hearing loss, or equipment damage.

Maintenance
- Remove the power plug from the AC outlet when cleaning the device.

Handling caution
- Do not insert your fingers or hands in any gaps or openings on the device (vents, panel, etc.).
- Avoid inserting or dropping foreign objects (paper, plastic, metal, etc.) into any gaps or openings on the device (vents, panel, etc.) If this happens, immediately turn off the power, unplug the power cord from the AC outlet, and have the device inspected by qualified Yamaha service personnel.
- Do not rest your weight on the device or place heavy objects on it, and avoid use excessive force on the buttons, switches or connectors to prevent injuries.
- Avoid pulling the connected cables to prevent injuries.
Precautions

Backup battery
• Do not replace the backup battery by yourself. Doing so may cause an explosion and/or damage to the device(s). When the backup battery needs to be replaced, “Low Battery” or “No Battery” will appear on the display. In this case, contact your Yamaha dealer and have qualified Yamaha service personnel replace the backup battery.

Yamaha cannot be held responsible for damage caused by improper use or modifications to the device, or data that is lost or destroyed.

NOTICE
To avoid the possibility of malfunction/damage to the product, damage to data, or damage to other property, follow the notices below.

Handling and maintenance
• Do not use the device in the vicinity of a TV, radio, stereo equipment, mobile phone, or other electric devices. Otherwise, the device, TV, or radio may generate noise.
• Do not expose the device to excessive dust or vibration, or extreme cold or heat (such as in direct sunlight, near a heater, or in a car during the day), in order to prevent the possibility of panel disfiguration, unstable operation, or damage to the internal components.
• Do not place vinyl, plastic or rubber objects on the device, since this might discolor the panel. When cleaning the device, use a dry and soft cloth. Do not use paint thinners, solvents, cleaning fluids, or chemical-impregnated wiping cloths.
• Condensation can occur in the device due to rapid, drastic changes in ambient temperature—when the device is moved from one location to another, or air conditioning is turned on or off, for example. Using the device while condensation is present can cause damage. If there is reason to believe that condensation might have occurred, leave the device for several hours without turning on the power until the condensation has completely dried out.
• Do not apply oil, grease, or contact cleaner to the faders. Doing so may cause problems with electrical contact or fader motion.
• Always turn the power off when the device is not in use.

Saving your data
• This product utilizes an internal backup battery* that is used to retain your data after the product is turned off. The backup battery is a consumable item. We recommend that you replace the backup battery before it is depleted, otherwise data retained in memory will be lost. When the backup battery needs to be replaced, “Low Battery” or “No Battery” will appear on the display. In this case, contact your Yamaha dealer and have qualified Yamaha service personnel replace the backup battery. The average life of the backup battery is approximately five years, depending on operating conditions.

* The following data are retained by the backup battery.
• Internal clock information
• No other data relies on the backup battery, therefore no other data will be lost if the backup battery is depleted.
• This product regularly saves the state of its workspace so that it can return to the previous state when the product is turned on. To ensure that the state is saved properly, wait at least 10 seconds after performing the last operation before turning the product off.

Connectors
• XLR-type connectors are wired as follows (IEC60268 standard):
  pin 1: ground, pin 2: hot (+), and pin 3: cold (–).

Information
• Copying of the commercially available musical data including but not limited to MIDI data and/or audio data is strictly prohibited except for your personal use.
• The illustrations and LCD screens as shown in this manual are for instructional purposes only.
• Steinberg Media Technologies GmbH and Yamaha Corporation make no representations or warranties with regard to the use of the software and documentation and cannot be held responsible for the results of the use of this manual and the software.
• Windows is a registered trademark of Microsoft® Corporation in the United States and other countries.
• Apple, iPad and iPod are trademarks of Apple Inc., registered in the U.S. and other countries.
• IOS is a trademark or registered trademark of Cisco in the U.S. and other countries and is used under license.
• Steinberg and Nuendo are registered trademarks of Steinberg Media Technologies GmbH.
• The company names and product names in this manual are the trademarks or registered trademarks of their respective companies.

• Software may be revised and updated without prior notice.
• This product contains recyclable components. When disposing of this product, please contact the appropriate local authorities.

European Models
Purchaser/User Information specified in EN55103-2:2009. Conforms to Environments: E1, E2, E3 and E4

Information for users on collection and disposal of old equipment:

By disposing of these products correctly, you will help to save valuable resources and prevent any potential negative effects on human health and the environment which could otherwise arise from inappropriate waste handling.

For more information about collection and recycling of old products, please contact your local municipality, your waste disposal service or the point of sale where you purchased the items.

For business users in the European Union:
If you wish to discard electrical and electronic equipment, please contact your dealer or supplier for further information.

Information on Disposal in other Countries outside the European Union:
This symbol is only valid in the European Union. If you wish to discard these items, please contact your local authorities or dealer and ask for the correct method of disposal.

(weee_eu_en_02)
2-1 Intended user
This product was designed for users who are familiar with using analog mixers as part of a PA system.

2-2 Intended usage
This product was designed to mix multiple audio sources, such as live band instruments or audio devices used at corporate events.

2-3 Included items
• AC power cord
• Quick Guide (this document)
• Nuendo Live (DAW software)

2-4 Documentation
Quick Guide (this document)
This document primarily explains panel controls, functions, and basic operation of the product.

Reference Manual (PDF; downloadable from the website)
This document primarily explains details about functions, production operation, and effects parameters. The Reference Manual covers the TF5/TF3/TF1 consoles as well as the TF-RACK (hereafter referred to as the “TF series”) and is available on the Yamaha Pro Audio website.

http://www.yamahaproaudio.com/

Using the Reference Manual
The Reference Manual is an electronic file in PDF format. You can read this document on a computer. Use Adobe® Acrobat Reader DC® to read this book on screen, search for words very quickly, print specific pages, or click links to display sections of special interest. The ability to search for words, or to follow links directly to relevant sections in the document, are helpful attributes of this electronic file format. We encourage you to take advantage of these benefits. You can download the latest Adobe Acrobat Reader DC application from the website listed below.
http://www.adobe.com/

2-5 Updating the product’s software and firmware
Software
Your TF-series console can be used with a variety of utility software.
• TF Editor
This application enables you to set up and operate the console from a connected computer. You can also use the application to back up console settings or set console parameters without connecting the console.
• TF StageMix
This app allows you to use your iPad and a Wi-Fi connection to remote control your TF-series console.
• MonitorMix
This app allows you to use your mobile device and a Wi-Fi connection to adjust the TF-series console’s AUX Send remotely.
• Yamaha Steinberg USB Driver (Windows only)
This driver software is required when connecting the console to your computer. It supports up to 34 channels of audio input and 34 channels of audio output.

Information about the software described here is available on the Yamaha Pro Audio website.
http://www.yamahaproaudio.com/

Information about downloading, installing and setting up the software described here is available on the website listed above. In addition, refer to the installation guide that is included with each program.

Firmware
The firmware contained in your TF-series console can be updated to take advantage of new features, feature improvements, and bug fixes. Details about updating the firmware are available online.
http://www.yamahaproaudio.com/
For information about updating and setting up the console, please refer to the firmware update guide available on the website.

2-6 Nomenclature used in this document
In this document, switch-type controls on the panel are called “keys.” Controls located on the panel are enclosed in [square brackets] (e.g., the [CUE] key) to distinguish them from virtual buttons and knobs displayed on screen. For certain controls, the name of the section appears before the brackets (e.g., SENDS ON FADER [AUX1] key).
3. Panels

3-1 Top panel

The top panel of TF Series consoles is divided into the following sections.

1. Channel Strip section (page 13)
2. ST IN (stereo input) section (page 13)
3. FX (effects) section (page 14)
4. USER DEFINED KEYS section (page 14)
5. MUTE section (page 14)
6. METER section (page 14)
7. PHONES section (page 14)
8. FADER BANK section (page 15)
9. TAP key (page 15)
10. SENDS ON FADER section (page 15)
11. Display section (page 15)
12. STEREO/MASTER section (page 17)
13. iPad connector (page 17)
14. USB connector (page 17)
Panels

OMNI OUT jacks
XLR-3-32 male output jacks that output analog audio signals. These jacks are used mainly to output AUX channels and STEREO channels. Nominal output level is +4 dBu. You can select which signal is output on the OMNI OUT screen.

ST IN jacks
Stereo input jacks that can be used for connecting a CD player or other line level device. These jacks are unbalanced female RCA jacks. Nominal input level is -10 dBV.

INPUT jacks
Combination jacks that support both XLR and TRS phone connectors. Use these jacks to connect mics and instruments. Nominal input level is -62 dBu to +10 dBu. The head amp setting for each jack is saved in memory.

NETWORK connector
RJ-45 jack used to connect the console to a computer via an Ethernet cable (CAT5e or higher recommended). Use STP (Shielded Twisted Pair) cable to prevent electromagnetic interference.

USB TO HOST connector
USB connector used to connect the console to a computer, allowing the console to function as an audio interface. Supports input and output for 34 channels of 48 kHz, 24-bit audio. When using with a computer running Microsoft Windows, the Yamaha Steinberg USB Driver is required. When using a Mac, Core Audio is used and therefore no extra drivers are required.

FOOT SW jack
Used for connecting an optional FC5 foot switch. You can use the connected foot switch as an effect bypass switch, a mute switch, or use it to tap the delay time.

Expansion slot
Allows you to install an NY card, such as the NY64-D Audio Interface Card. (Installing an NY card → page 26)

Exhaust holes
The unit contains a built-in cooling fan. These holes are used to expel air from the unit. To prevent overheating or malfunction, do not block the exhaust holes.

Power switch
When the switch is in the position, the power is on. When the switch is in the position, the power is off.

AC IN connector
Connect the included power cord. When connecting to a power outlet, first connect the power cord to the console, then connect the power cord to the power outlet.

CAUTION
• Make sure the unit is turned off before connecting or disconnecting the power cord.
• Disconnect the power cord from the outlet when the unit will not be used for extended periods of time.
4. Workflow Overview

Here’s a brief overview of how to start mixing using a Presets.

1 Connect

Connect the instruments and mics.
Connect output devices such as powered speakers.
Connect the included power cord to the AC IN connector.

When your connections are finished, turn on the power.

NOTICE

• This product regularly saves the state of its workspace so that it can return to the previous state when the product is turned on. To ensure that the state is saved properly, wait at least 10 seconds after performing the last operation before turning the product off.
• After turning the unit off, wait for at least 6 seconds before turning it on again. Rapidly turning the unit off and on in succession can cause it to malfunction.

2 Use Presets to Set Up Each Channel

Step 1
Press the [SEL] key to select a channel.

Step 2
Press the Library key ( ) to access the Library and recall a Preset.

Step 3
Adjust the channel’s parameters.
Adjust the input gain, EQ, compressor, and gate.
These can be adjusted from the OVERVIEW screen or the individual configuration screens (page 18).

> Repeat steps 1 to 3 and set up each channel.

NOTE
You can set up channels without using Presets. For details about the available features and parameters, refer to the Reference Manual.
3 Adjust the Mix

Do a sound check and adjust the overall mix.
- Adjusting SENDS ON FADER for the level sent to AUX for each channel (page 15)
- Muting all input channels or effects (page 14)
- Turning effects on and off, adjusting the overall level of effects (page 14)

4 Save Your Settings

You can save your entire mix setup as a Scene. Scenes can be recalled later as needed.
(SCENE window → page 18)
You can also save individual channel setups by overwriting existing Presets or by saving them as new Presets in the Library screen.

HINT Using USER DEFINED KEYS

When the console is in the default state, USER DEFINED KEYS (page 14) are configured as “Direct Scene Recall” keys. You can save a Scene by pressing and holding down one of the USER DEFINED KEYS, and recall a Scene by pressing one of the USER DEFINED KEYS.

What is a “Preset”? 
A Preset is a file stored in the Library that contains channel settings such as the type of input (instrument or mic), equalizer and compression settings, etc. The default Presets contain settings for various types of instruments, so you can use them as a starting point when setting up a channel. You can edit Presets and save them as new Presets.

What is a “Scene”? 
A Scene is a file that contains all the settings for every channel in your mix.

Saving a Scene

Recalling a Scene
5. Connections

Connecting outputs

Powered speakers (floor monitors)

OMNI OUT 1  AUX1 OUT

ST IN 2R ST IN 2R ST IN 2R

Default signal routing for each channel is shown above. To change the signal routing, use the INPUT screen (page 20).

HINT

What if I’m using condenser mics?
Phantom power must be supplied to condenser mics. Some direct boxes also need phantom power. When using phantom power, first set “+48V Master” on the SETUP screen to on, then turn phantom power on or off for each channel on the corresponding channel’s INPUT screen. Make sure you turn phantom power off if it is not needed. For more details, refer to the Reference Manual.

Why can’t I hear anything?
• Is the fader that corresponds to the desired INPUT jack raised?
• Does the input select for each channel match each INPUT jack?
• Is the channel’s head amp gain set too low?
• Is the channel’s [ON] key pressed?
• Is the channel muted?

Connecting outputs

Powered speakers (front speakers)
This section briefly introduces the console’s features.

**NOTE**
For details about the available features and parameters, refer to the Reference Manual.

### 6-1 Channel Strip section

Similarly to a channel module of a traditional analog mixer, a Channel Strip allows you to manually control the main parameters of the channel.

1. **[SEL]** key
   Used to select the channel that you will control. Pressing this key will cause the key to light, which indicates that you can control the channel on the display. For stereo channels, you can press the [SEL] key to switch between the left and right channel of the stereo pair.

2. **[CUE]** key
   Used to select the channel that will be cue-controlled. The key lights when the CUE is on.

3. **Meter LEDs**
   Indicate the audio signal level of the corresponding input or output channel.

4. **[ON]** key
   Turns the corresponding channel on and off. The key lights when the channel is on. In SENDS ON FADER mode, the key functions as an on/off switch for signals sent from the corresponding channel to the currently selected AUX or FX bus.

5. **Channel name display**
   Displays the name, ID, or port name that is assigned to the corresponding channel. It also serves as the +48V, GATE, and COMP indicator, and displays the fader value.

6. **Channel color indicator**
   Lights in the color assigned to the corresponding channel.

7. **Fader**
   Adjusts the channel’s signal level. In SENDS ON FADER mode, the fader allows you to adjust the signal level sent from the corresponding channel to the currently selected AUX or FX bus.

### 6-2 ST IN (Stereo Input) section

This section controls the stereo inputs. ST IN1 is used as the playback channel for iOS devices connected to the iPad connector or audio files stored in the connected USB storage device. ST IN2 is used as the playback channel for signals received from the USB TO HOST connector (USB IN33/34). You can switch the input signals for both ST IN1 and ST IN2 from the INPUT screen.

1. **[SEL]** key
   Used to select the ST IN channel that you will control. You can press the [SEL] key to switch between the left and right channel of the stereo pair.

2. **[CUE]** key
   Used as the cue monitor key for the ST IN channel. The key lights when the cue is on.

3. **Meter LEDs**
   Indicate the audio signal level of the corresponding input or output channel.

4. **[ON]** key
   Turns the corresponding ST IN channel on and off. The key lights when the channel is on. In SENDS ON FADER mode, turns the signal sent to the AUX or FX bus on and off.

5. **[LEVEL]** knob
   Adjusts the signal level of the corresponding ST IN channel. In SENDS ON FADER mode, adjusts the signal sent to the AUX or FX bus.

**HINT**
For TF5 and TF3 consoles, ST IN can also be controlled using INPUT 2 in the FADER BANK.
6-3 FX section

Allows you to control the FX RTN channels.

1 [EDIT] key
   Displays the FX1/FX2 screen. The key lights while the FX SEND screen is displayed.

2 [CUE] key
   Used as the cue monitor key for the corresponding FX channel. The key lights when the CUE is on. The key lights when the cue is on.

3 Meter LEDs
   Indicate the audio signal level of the corresponding FX channel.

4 [ON] key
   Turns the corresponding FX channel on and off.

5 [LEVEL] knob
   Adjusts the total output level of the corresponding FX channel.

HINT

For TF5 and TF3 consoles, FX can also be controlled using INPUT 2 in the FADER BANK.

6-4 USER DEFINED KEYS section

These keys can be customized to control the desired function. Various functions are assigned by default, such as Direct Scene Recall.

6-5 MUTE section

Used to mute all channels in a mute group.

1 [INPUT] key
   Allows you to mute all input channels. The key lights when the mute group is muted.

2 [FX] key
   Allows you to mute the FX module. Insertion effects for channels in AUX9/10–AUX19/20 are bypassed. The key lights when the mute group is muted.

HINT

You can remove certain input and FX channels from the mute group by turning MUTE SAFE on for the desired channels.

6-6 METER section

Used to monitor audio signal level and control the CUE feature.

1 Meter LEDs
   Indicate the audio signal level of the STEREO or CUE bus.

2 [CLEAR] key (CLEAR CUE key)
   Turns off the CUE for all channels. The key lights when the CUE is turned on.

6-7 PHONES section

1 [PHONES] jack
   This headphones jack is used to monitor signals selected for MONITOR or CUE.

2 [LEVEL] knob
   Controls the level of the [PHONES] jack output.
6-8 FADER BANK section
Allows you to quickly assign different channels to the console’s faders.

1 [INPUT1], [INPUT2] keys
Allow you to change the channels that are assigned to the console’s faders. The keys light to indicate which fader bank is currently selected. You can press the [INPUT1] and [INPUT2] keys at the same time to light both keys and display the GROUP BANK in the Channel Strip section.

2 [OUTPUT] key
Displays the OUTPUT BANK in the Channel Strip section. You can press the [INPUT2] and [OUTPUT] keys at the same time to light both keys and display the CUSTOM FADER BANK in the Channel Strip section.

6-9 TAP section

1 [TAP] key
Allows you to tap and set the delay time used for effects on FX1/FX2 and AUX9/10–AUX19/20. The key flashes in time with the tempo. The tempo you tap on the [TAP] key is applied to effects that have “Sync” set to “On”. You can set the [TAP] key flashing to “Off” in the SETUP screen.

6-10 SENDS ON FADER section
Switches each channel strip to temporarily control the SEND LEVEL and SEND ON of the designated bus.

1 [SENDS ON FADER] keys
Press a key to set the corresponding bus to SENDS ON FADER mode. The key you pressed lights to indicate SENDS ON FADER mode is enabled. Press the key again to release SENDS ON FADER mode.

6-11 Display section
Allows you to control the console by touching the touchscreen. You can also use the knobs to perform fine adjustments. You can dive further into various features by pressing the keys to display contextual menus.

1 Display
You can use familiar touchscreen operations, such as touch, double-touch, sliding, swiping, pinching in, and pinching out.

2 Library key
Displays the Library screen, from which you can recall Presets.

3 Home key
Returns the display to the OVERVIEW screen. The display will change with the content set in Key Function on the PREFERENCE screen by pressing the home key while the OVERVIEW screen is displayed.

4 Menu key
Displays the menu for the current operation. The key lights when a menu is available.

5 [TOUCH AND TURN] knob
Allows you to control the parameter of the feature selected on the display. For information about how to control the parameters, see “Controls and functions” (page 16).

6 [SHIFT] key
Provides additional functionality, such as allowing you to switch between the F (frequency) and G (gain) parameters of the EQ handle.

7 [USER DEFINED KNOBS]
These knobs allow you to adjust the parameters that you’ve assigned to them. You can assign parameters to each knob in the USER SETUP screen.
Controls and functions

Operating the display

- Changing screens
  The screen switches when you touch an on-screen button.
  You can touch an area of the screen to select that area, then touch it again to switch to the configuration screen for that area. If an area is displayed in pink when selected, the area contains a parameter that can be controlled with the [TOUCH AND TURN] knob.
  To return to the OVERVIEW screen, press the Home key ( ).

- Scrolling
  In the OVERVIEW screen, you can slide the screen left and right to view different channels. When a scroll bar is displayed, you can slide the screen up and down to view more content. To scroll quickly, simply use a swiping gesture.

- Adjusting the Q (steepness) of the EQ
  When in manual mode on the EQ screen, select one of the handles and pinch in or out to adjust the Q.

NOTE
In the SETUP → PREFERENCE screen, select the contents to be displayed in the OVERVIEW screen by using the Key Function → [HOME] key. When multiple items are selected, the display will change with each press of the Home key ( ).

NOTE
This functionality is not available when multiple parameters can be controlled by one knob (i.e., 1-knob mode). Use the button at the top of the screen to switch to manual mode.

Using the [TOUCH AND TURN] knob to control parameters

As shown below, touch the parameter you want to control (1) and then turn the [TOUCH AND TURN] knob as desired (2). A pink selection area is displayed around the selected parameter.
In the OVERVIEW screen, touch an area of the screen to adjust the parameter in that area. In this case, a pink selection area is displayed around the selected area.

HINT
What is “1-knob” mode?
1-knob mode allows you to control multiple EQ or compressor parameters by simply turning the [TOUCH AND TURN] knob. When 1-knob mode is enabled, parameters cannot be adjusted individually. You can turn 1-knob mode on and off from the EQ and compressor screens.
6-12 STEREO/MASTER section

Allows you to control the main parameters of the STEREO channel.

1. [SEL] key
   Used to select the STEREO channel that you will control. You can press the [SEL] key to switch between controlling the left and right channel of the stereo pair.

2. [CUE] key
   Used as the cue monitor key for the corresponding STEREO channel. The key lights when the CUE is on.

3. Meter LEDs
   Indicate the audio signal level of the STEREO channel. In SENDS ON FADER mode, indicate the audio signal level of the bus selected by the SENDS ON FADER key.

4. [ON] key
   Turns the STEREO channel on and off. The key lights when the channel is on. In SENDS ON FADER mode, the [ON] key turns the bus selected by the SENDS ON FADER key on and off.

5. [MASTER] LED
   Lights when SENDS ON FADER mode is turned on. In SENDS ON FADER mode, the entire section becomes the master section for the selected bus.

6. Fader
   Adjusts the output level of the STEREO channel. In SENDS ON FADER mode, the fader adjusts the signal level sent to the bus selected by the SENDS ON FADER key.

6-13 iPad connector

Allows you to connect an iOS device or a USB storage device.

To connect an iOS device, use the dedicated cable that was included with the device. This connector allows you to use audio files on your iOS device as background music.

When a USB storage device is connected, you can use the device to play audio files or record the mixer’s output directly and save it as an audio file (format: WAV).

NOTE
When using a USB storage device for recording, use a hard disk drive or other high-speed device. (USB memory drives are not guaranteed to function properly.)

For information about compatible iOS devices, visit the Yamaha pro audio website.
http://www.yamahaproaudio.com/

6-14 USB connector

Used for connecting USB memory drives.

You can connect a USB memory drive and read/write data from/to the drive.

- Supported formats for USB memory drives
  Drives formatted using FAT32 are supported.

- Preventing accidental erasure
  Some USB memory drives offer a write-protect feature which prevents accidental data erasure. If you save important data on a USB memory drive, we recommend using the drive’s write-protect feature to protect your data from being erased. Conversely, make sure the drive’s write-protect feature is turned off before trying to save data to the drive.

NOTE
The ACCESS indicator is displayed in the upper right of the screen while data is being accessed (read, written, erased, etc.). While this indicator is displayed, do not turn off the unit or disconnect the USB memory drive. The unit, the drive, and data stored on the drive could become damaged.
7. Displaying the configuration screens

You can view the following screens by touching the buttons in the OVERVIEW screen. To return to the OVERVIEW screen, press the Home key (Home) below the display.

**METER**
Displays the input and output level.

**SCENE**
Used to recall previously saved mixer setups.

**OVERVIEW**
Provides an overall view of a channel's settings. You can adjust settings on this screen or switch to the dedicated screen for each setting. You can also edit the Channel Name on this screen.

**LOGIN**
Allows you to select the user, change account settings, and use the console lock feature.

**CUE/MONITOR/OSCILLATOR**
Used to manage CUE/monitor source and control oscillators.
INPUT/OUTPUT/TITLE LIST
Allows you to record directly to a computer or USB storage device, play back audio files, manage titles, etc.

OVERVIEW

SETUP
Used to configure general mixer settings, OMNI OUT settings, recall safe settings, assign user-defined keys and knobs, configure custom fader banks, and set up other preferences.
If a Tio1608-D is connected to the NY64-D, settings for the Tio1608-D are also available on this screen.
Displaying the configuration screens

While viewing the OVERVIEW screen, you can double-touch an area of a channel to switch to that area’s configuration screen. While viewing a configuration screen, you can easily switch to another area by touching the desired area in the left side of the screen. To return to the OVERVIEW screen, press the Home key (HOME) below the display. In the example shown here, we will explain how to switch to the different screens from the input channel screen. For details or information about other screens, refer to the Reference Manual.

INPUT
Allows you to change input channel settings.

GATE
Allows you to configure the noise gate for each channel.

OVERVIEW CH STRIP section
Provides an overall view of the mixer. From here you can move to the different screens.

NOTE
In the SETUP → PREFERENCE screen, select “Selected Channel” in the Key Function setting using the [HOME] key to display the SELECTED CHANNEL section in the OVERVIEW screen.

OVERVIEW SELECTED CHANNEL section
Provides an overall view of the selected channel’s settings.

EQ
Controls the EQ for each channel.

COMP
Allows you to configure the compressor for each channel.
Displaying the configuration screens

**FX1/FX2**
Used to select effects and edit their parameters.

**ASSIGN**
Allows you to turn Recall Safe and Mute Safe on and off, assign the channel to a DCA, and adjust the SUB bus send level.

**CH VIEW**
Provides an overall view of a channel’s settings. You can adjust settings on this screen or switch to the dedicated screen for each setting.

**OVERVIEW CH STRIP section**
Provides an overall view of the mixer. From here you can move to the different screens.

**SEND TO AUX**
Allows you to set each channel’s AUX bus send levels.

**AUTOMIXER**
Sets the AUTOMIXER that can be used for CH1–CH8.
Displaying the configuration screens

**FX1/FX2**
Used to select effects and edit their parameters.

**SEND TO AUX**
Allows you to set each channel's AUX bus send levels.

**OVERVIEW SELECTED CHANNEL section**
Use this screen for the major operations in setting up the selected channel. Here you can also see the settings for all channels at a glance, and go to each respective screen to make the detailed settings.

**GATE**
Allows you to configure the noise gate for each channel.

**COMP**
Allows you to configure the compressor for each channel.

**EQ**
Controls the EQ for each channel.

**NOTE**
In the SETUP → PREFERENCE screen, the section that you selected using the Key Function → [HOME] key will be shown.
Displaying the configuration screens

**INPUT**
Allows you to change input channel settings.

**ASSIGN**
Allows you to turn Recall Safe and Mute Safe on and off, assign the channel to a DCA, and adjust the SUB bus send level.

**OVERVIEW SELECTED CHANNEL section**
Use this screen for the major operations in setting up the selected channel. Here you can also see the settings for all channels at a glance, and go to each respective screen to make the detailed settings.

**CH VIEW**
Provides an overall view of a channel’s settings. You can adjust settings on this screen or switch to the dedicated screen for each setting.

**AUTOMIXER**
Sets the AUTOMIXER that can be used for CH1–CH8.

**LIBRARY**
This calls up the presets that are saved.
8. Setup

This section explains how to set up the TF series console the first time you turn it on.

8-1 Setting the internal clock

Set the console’s internal clock, including the date, time, and format. The date and time set here is used as a timestamp when saving Scenes.

1 Touch the SETUP icon

The SETUP screen is displayed.

2 Touch the TIME button.

The screen for setting the time is displayed.

3 Slide the desired fields up and down to set the date and time.

4 When finished, touch [OK].

5 Press the Home key (Home).

The OVERVIEW screen is displayed.

NOTE

The following operations are available on the SETUP screen, including the internal clock settings. For details, refer to the Reference Manual.

• Saving and loading the console settings to/from a USB storage device
• PREFERENCE settings
• Settings for [USER DEFINED KEYS], [USER DEFINED KNOBS] and functions assigned to the foot switch
• Custom fader bank settings
• AUX bus signal type
• OMNI OUT settings
• Settings related to controlling the Tio1608-D that is connected to the NY64-D
• Recall Safe target channel settings
• Mute group settings
• Display brightness settings
• Network settings

8-2 Initialization (factory reset)

In the event that an internal memory error occurs or you have forgotten your password and cannot operate the console, you can use the following procedure to initialize the console.

NOTE

All information that you have stored in the unit will be erased when you initialize the unit. Use caution when performing this procedure.

1 Turn on the console while holding down the Home key (Home).

2 When the maintenance screen appears, press the Initialize All Memories button.

All settings will be restored to the factory defaults.
8-3 Attaching the optional Rack Mount Kit (RK5014) (TF1 only)

The procedure is the same for the left and right sides of the console. The right side is shown here.

Precautions when rackmounting

This unit is rated for operation at ambient temperatures ranging from 0 to 40 °C. If you install this unit in a poorly ventilated rack along with other devices, the ambient temperature inside the rack may rise, resulting in inefficient performance. Be sure to follow the guidelines below to prevent overheating.

• When mounting this unit in a rack with devices such as power amplifiers that generate a significant amount of heat, leave more than 1 U of space between this unit and other equipment. Also, either leave the open spaces uncovered or install appropriate ventilating panels to minimize the possibility of heat buildup.

• To ensure sufficient airflow, leave the rear of the rack open and position it at least 10 cm from walls or other surfaces. If the rear of the rack cannot be left open, install a commercially available fan or similar ventilation product to secure sufficient airflow. If you have installed a fan kit, there may be cases in which closing the rear of the rack will produce a greater cooling effect. Refer to the rack and/or fan unit manual for details.

1 Prepare the console by removing the side pads.
   1. Remove the two screws that secure each side pad.
   2. Slide and remove the side pads as shown.

2 Attach the rack mount brackets.
   1. Attach the rack mount brackets to the console using the 8 screws (4 per side) that were included with the Rack Mount Kit.
   2. Make sure each bracket is firmly attached.

3 Mount the console into the rack, and fasten it into place.

Refer to the rack and/or fan unit manual for details.
8-4 Installing an NY card

Before installing an NY card in the expansion slot, confirm that the card is compatible with TF-series consoles. For information about compatible cards, visit the Yamaha pro audio website.
http://www.yamahaproaudio.com/

1 Confirm that the console is turned off.

***CAUTION***
Inserting or removing a card while the unit is turned on may cause electrical shock and damage to the device.

2 Remove the screws that secure the slot cover, and then remove the cover.

The screws will be used to secure the NY card. The slot cover will not be used while the card is installed; store it in a safe place for later use.

3 Align the sides of the NY card with the guide rails inside the expansion slot, and then insert the NY card.

Make sure you insert the card fully, so that the connection terminal on the NY card is firmly connected to the connection terminal inside the slot.

4 Use the screws you removed in step 2 to secure the NY card.

Do not use the console without using the screws to secure the NY card.
Using the console without securing the card may cause damage to the product and malfunctions.

***NOTE***
When connecting a Tio1608-D, refer to the Tio1608-D Owner’s Manual.

Removing the NY card

1 Confirm that the console is turned off.

***CAUTION***
Inserting or removing a card while the unit is turned on may cause electrical shock and damage to the device.

2 Remove the screws that secure the NY card.
9. Troubleshooting

### Problems and Causes | Solutions
---|---
**No sound**
The input source (input port) settings for the input channel are incorrect. | Check the input source (input port) settings on the INPUT screen.
The [ON] key for the corresponding channel is turned off. | Turn it on.
The fader or volume for the corresponding channel is turned down. | Raise the fader or volume.
Phantom power is not being supplied (when using a condenser mic). | Set “+48V Master” on the SETUP screen to on, and then turn on phantom power on the corresponding INPUT screen.
The mute is on. | Check the MUTE keys.
Too much gate is being applied. | Check the settings on the GATE screen.

### Sound level is too low
The gain is too low. | Adjust the gain on the INPUT screen.
Too much gate or compression is being applied. | Check the settings on the GATE or COMP screens.

### Sound is distorted
The gain is too high. | Adjust the gain on the INPUT screen.
The audio being input is too high. | Lower the volume of the audio source.

### No audio heard from portable audio player connected to iPad connector
The input source for ST IN 1 is not correct. | Set the INPUT source to “PLAYBACK”.
The connected portable audio player is not compatible with the console. | For information about compatible portable audio players, refer to the Reference Manual. For the latest information, visit the Yamaha Pro Audio website.

### No audio heard from portable audio player connected to iPad connector
The console and computer are not assigned to the same subnet mask. | If using Static IP address provisioning, set the console to the same subnet mask as the computer. If using DHCP provisioning, connect the console to a network router, and make sure the computer is configured to receive its network settings automatically (i.e., from a DHCP server).

### Cannot find the driver for Mac
The console utilizes Core Audio drivers; no additional drivers are needed. | You do not need to install drivers when connecting the console to a Mac.

### Cannot input audio from Tio1608-D
The NY64-D is not installed correctly in the expansion slot. | Make sure the NY64-D is installed correctly.
The console is not connected correctly to the Dante network. | Make sure the console is connected correctly to the Dante network.
Settings related to the Tio1608-D are not correct. | Make sure the UNIT ID switch, QUICK CONFIG switch, and DIP switches on the rear panel of the Tio1608-D are in the correct positions.
Dante patch settings are not configured. | When using Quick Config:
• Make sure the QUICK CONFIG switch on the Tio1608-D is in the “on” position.
• Make sure the Quick Config button on the console’s SLOT SETUP screen is turned on.
When not using Quick Config:
• Use Dante Controller to configure the Dante patch settings.
Dante Device Configuration for the Tio1608-D or NY64-D is incorrect. | When using Quick Config: Enable Quick Config and then restart the console and the Tio1608-D. When not using Quick Config: Use Dante Controller to configure the devices.

### Cannot control Tio1608-D headamp from console (but audio input/output is functioning)
The console’s HA Control is turned off. | Turn on the HA button on the console’s SLOT SETUP screen.
More than two consoles or R Remote applications are connected. | Make sure there are only two consoles or R Remote applications on the Dante network that can control the Tio1608-D headamp and then restart the Tio1608-D.
Input source (input port) settings are not set to “SLOT”. | Set the INPUT SELECT on the console’s INPUT screen to SLOT.

### The fader does not work
The action on the motor faders may be out of alignment. | Calibrate the faders.
1. Turn on the console while holding down the Home key on the top panel.
2. Display the Fader Calibration screen.
3. Press the [SEL] key on the top panel to select the fader to calibrate.
4. Touch the START button on the FADER CALIBRATION MODE screen.
5. Touch the OK button in the confirmation dialog.
6. When calibration is finished, touch the APPLY button.
7. Touch the EXIT button on the start menu to start up in normal mode.

</table>

<sup>1</sup> Pull-up/down function is not supported.

<sup>2</sup> Total Harmonic Distortion is measured with a –18 dB/octave filter@80 kHz.

<sup>3</sup> Hum & Noise are measured with an A-Weight filter.

<sup>4</sup> Crosstalk is measured with a –30 dB/octave filter@22 kHz.

<sup>5</sup> The input jacks use +48V DC (phantom power), which can be set on/off for each jack in the software of this unit.

Source code distribution

For three years after the final factory shipment, you may request from Yamaha the source code for any portions of the product which are licensed under the GNU General Public License/GNU Lesser General Public License/RealNetworks Public Source License by writing to the following address:

10-1 Nakazawa-cho, Naka-ku, Hamamatsu, 430-8650, JAPAN

PA Division, Yamaha Corporation

The source code will be provided at no charge; however, we may require you to reimburse Yamaha for the cost of delivering the source code to you. The source code can be downloaded by visiting the following URL:

http://www.yamahaproaudio.com/

• Note that we shall bear no responsibility whatsoever for any damage arising from changes (additions/deletions) made to the software for this product by a third party other than Yamaha (or party authorized by Yamaha).
• Note that re-use of source code released to the public domain by Yamaha is not guaranteed. Yamaha shall not bear any responsibility whatsoever for the source code.
